

Practical 2

Creating account, repository on Github and Cloning repository in Github.

a) Creating Account:

Step 1: Go to <https://github.com/join> in a web browser. You can use any web browser on your computer, phone or tablet to join.

The screenshot shows the GitHub 'Create your account' page in a web browser. The address bar shows 'github.com/join'. The page has a dark header with the GitHub logo and navigation links. The main content area is white and contains the following fields and sections:

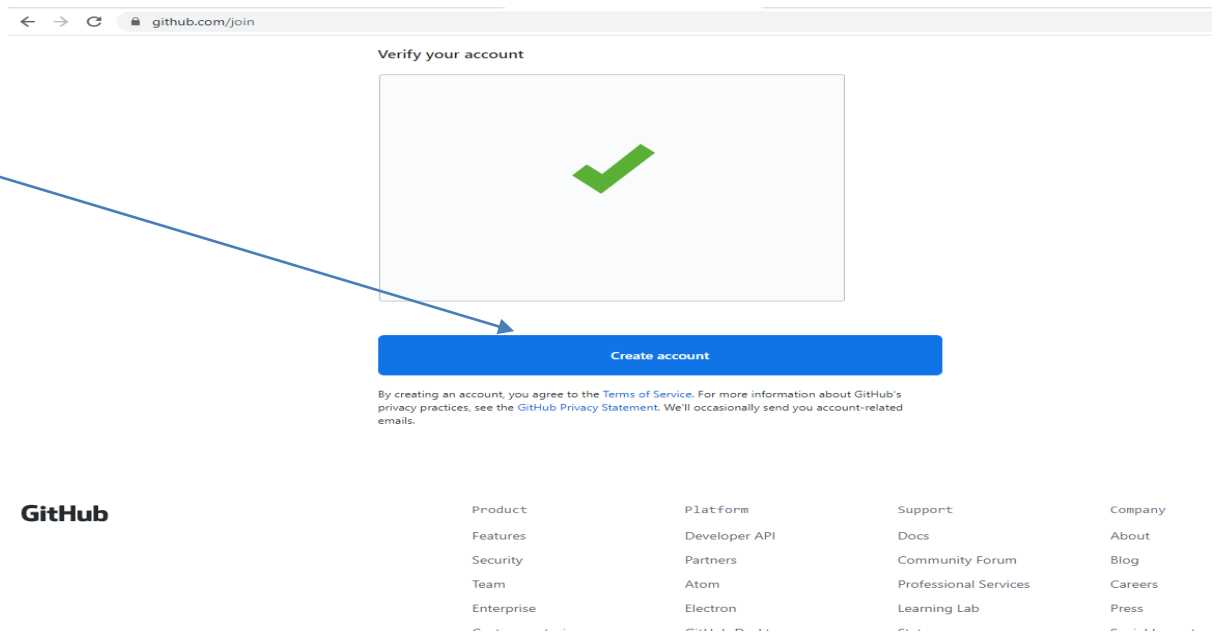

- Username ***: A text input field.
- Email address ***: A text input field.
- Password ***: A text input field.
- Make sure it's at least 15 characters OR at least 8 characters including a number and a lowercase letter. [Learn more.](#)
- Email preferences**: A checkbox labeled 'Send me occasional product updates, announcements, and offers.' which is checked.
- Verify your account**: A section with a large box containing the text 'Please solve this puzzle so we know you are a real person' and a 'Verify' button.

Step 2: Enter your personal details and complete the CAPTCHA puzzle.

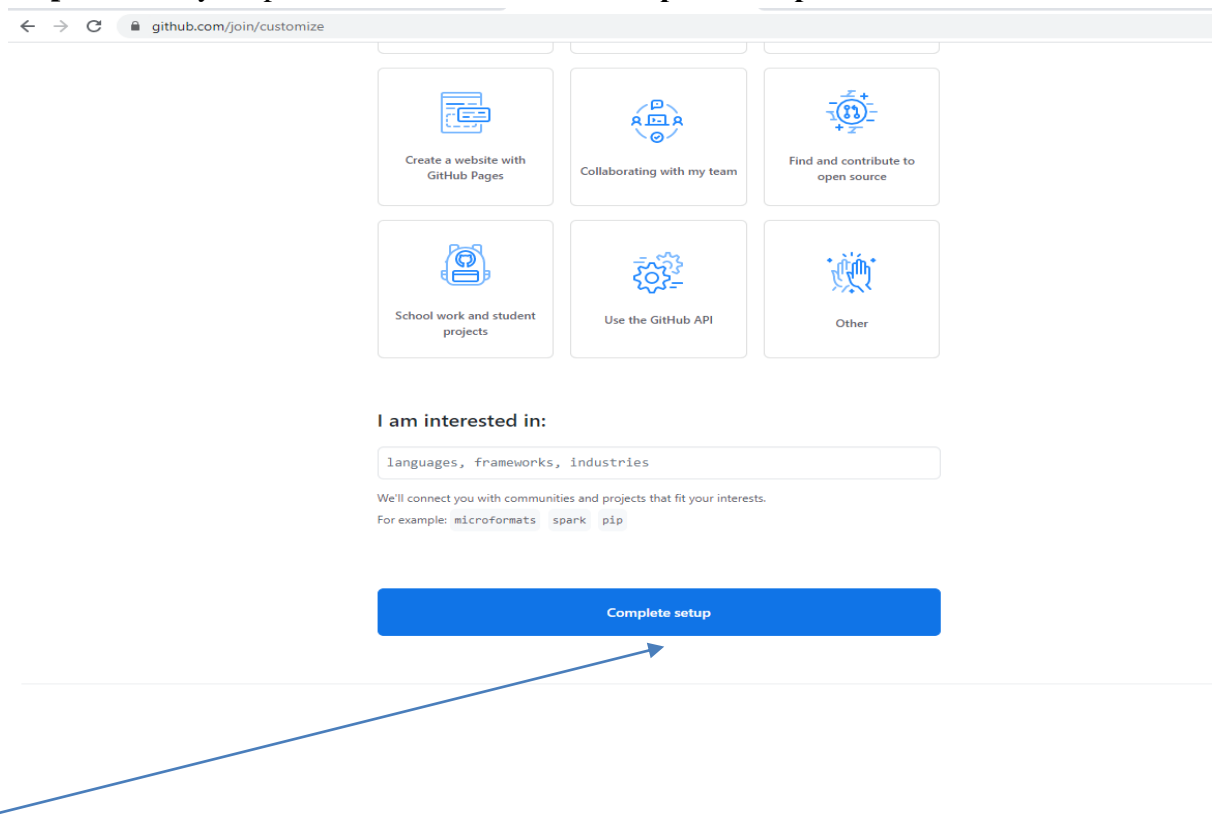

This screenshot shows the same GitHub 'Create your account' page, but the CAPTCHA puzzle has been completed. The 'Verify' button is now a green checkmark. Below the puzzle box is a large blue button labeled 'Create account'. At the bottom, there is a small disclaimer: 'By creating an account, you agree to the [Terms of Service](#). For more information about GitHub's privacy practices, see the [GitHub Privacy Statement](#). We'll occasionally send you account-related emails.'

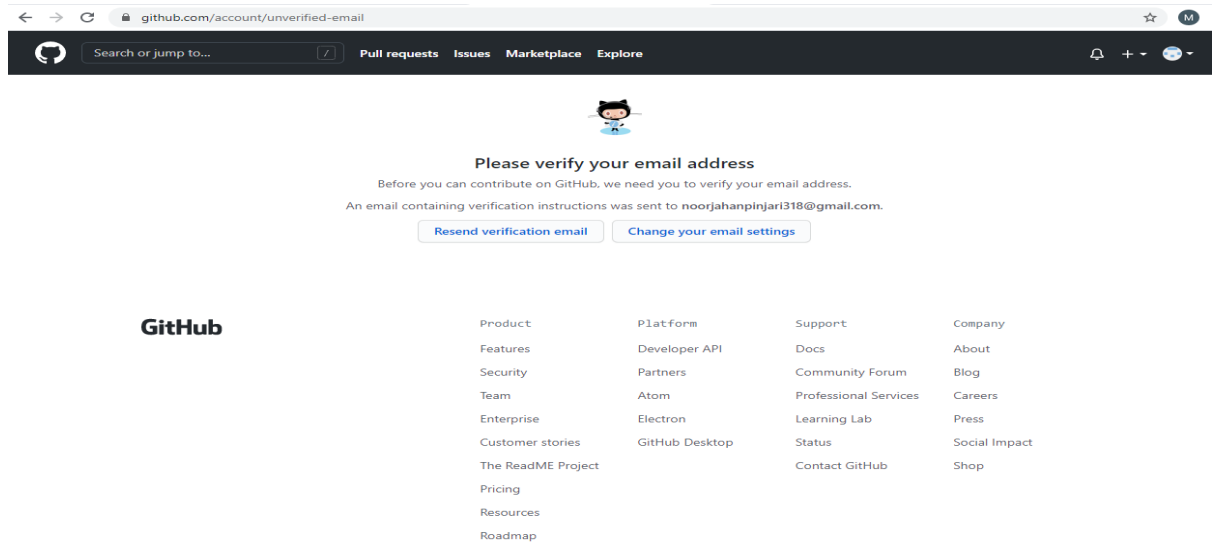

Step 3: Click the 'Create account' button below the form.

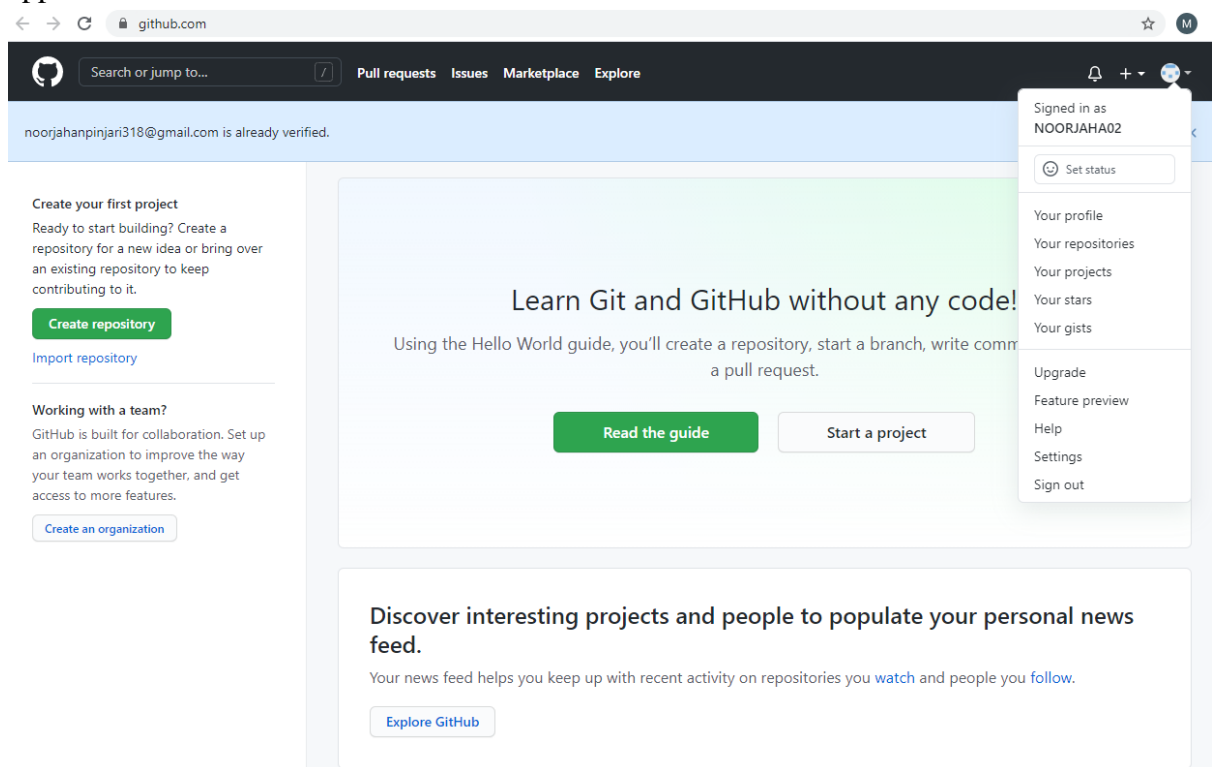

Step 4: Select your preferences and click on 'Complete Setup'.

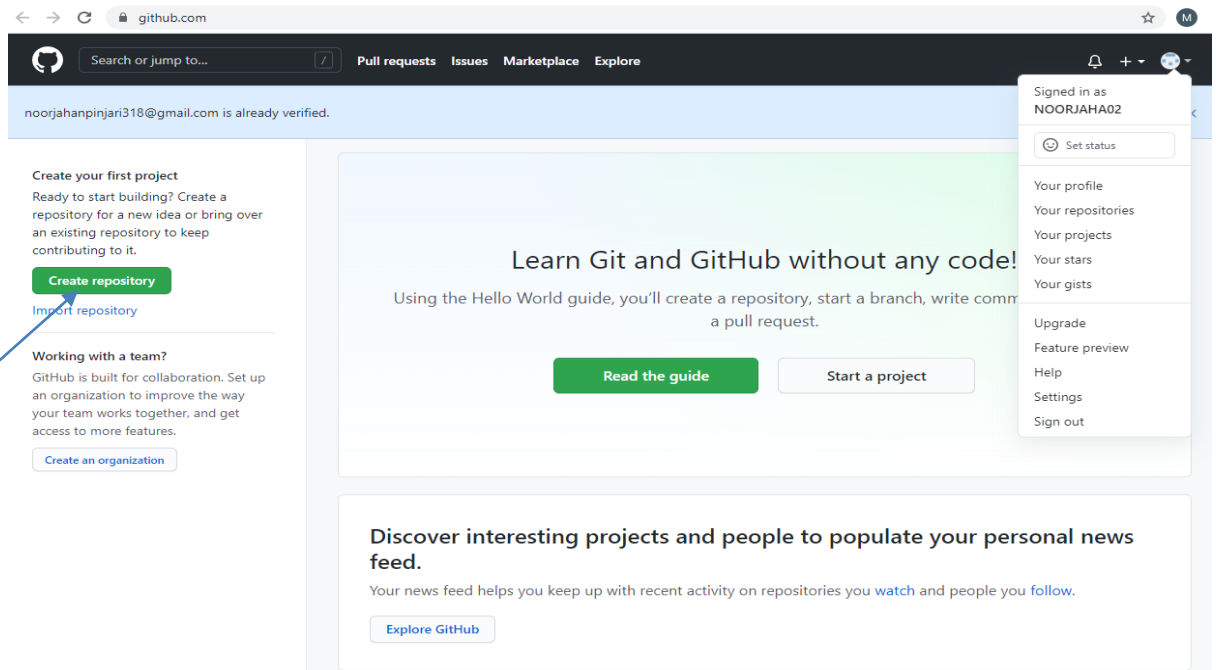

Step 5: Verify your email. This confirms your email address and returns you to sign up process.

Step 6: After the email verification the account will be created. The below page will appear once the account is created.

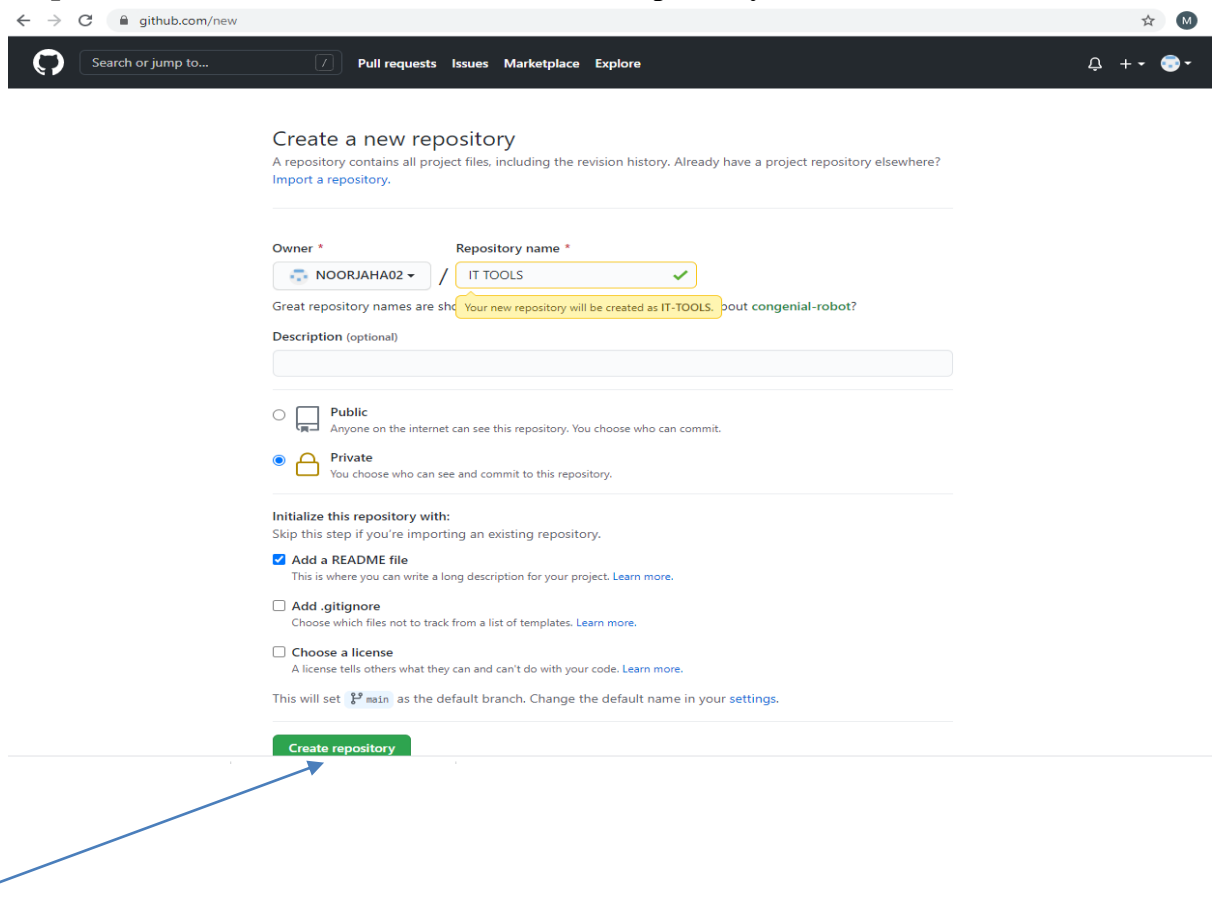

b) Creating Repository:

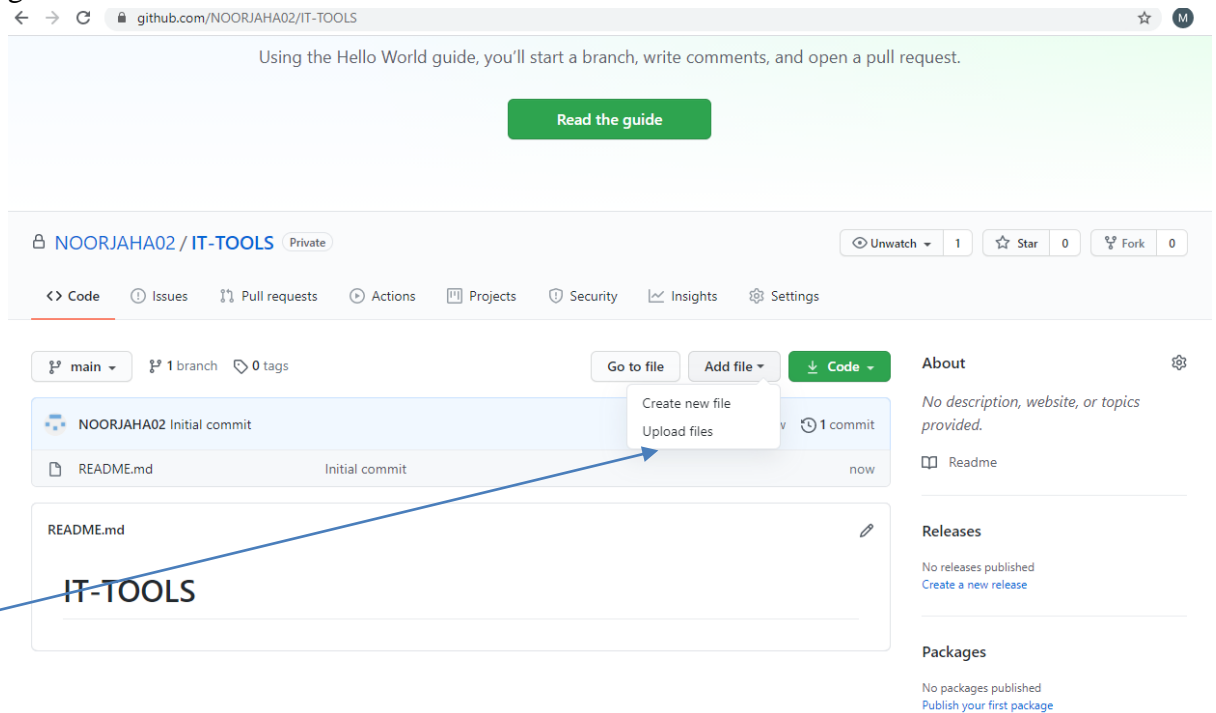

Step 1: Click on the ‘Create Repository’ button given on the left side.

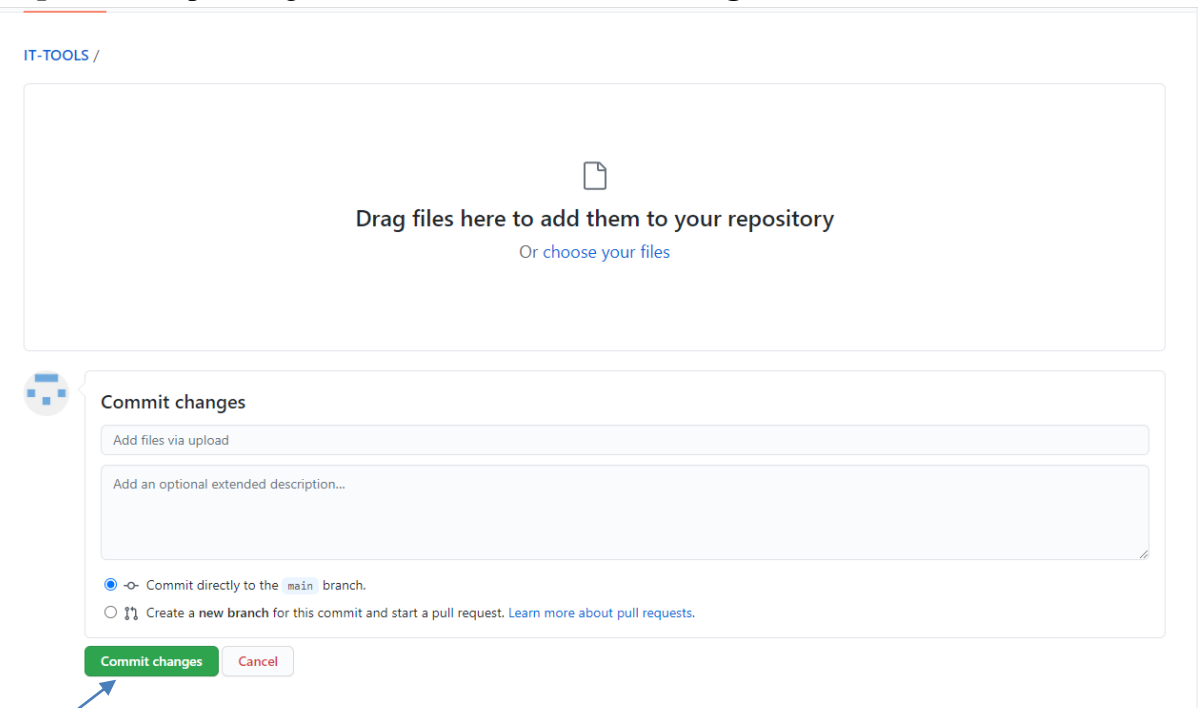

Step 2: Fill the details and click on the ‘Create repository’ button below.

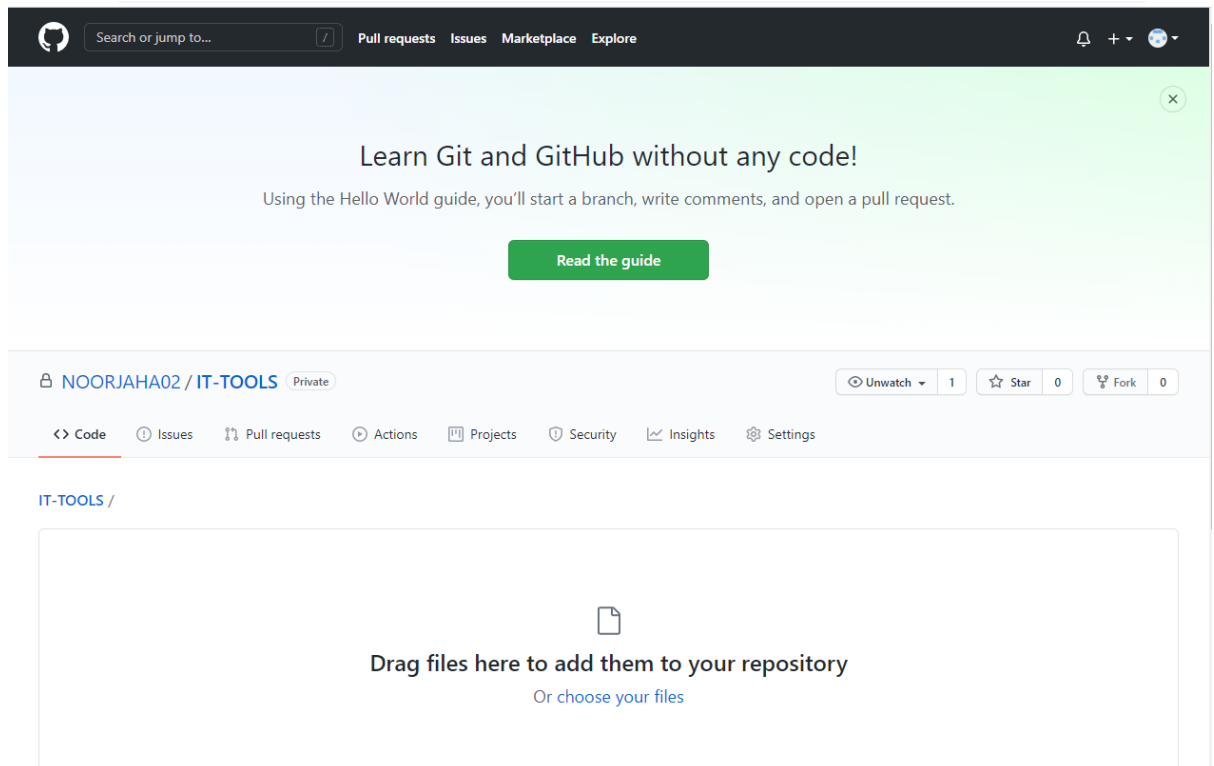

Step 3: You can also create or upload files in your repository from your system as given below.

Step 4: After uploading files click on the ‘Commit changes’ button.

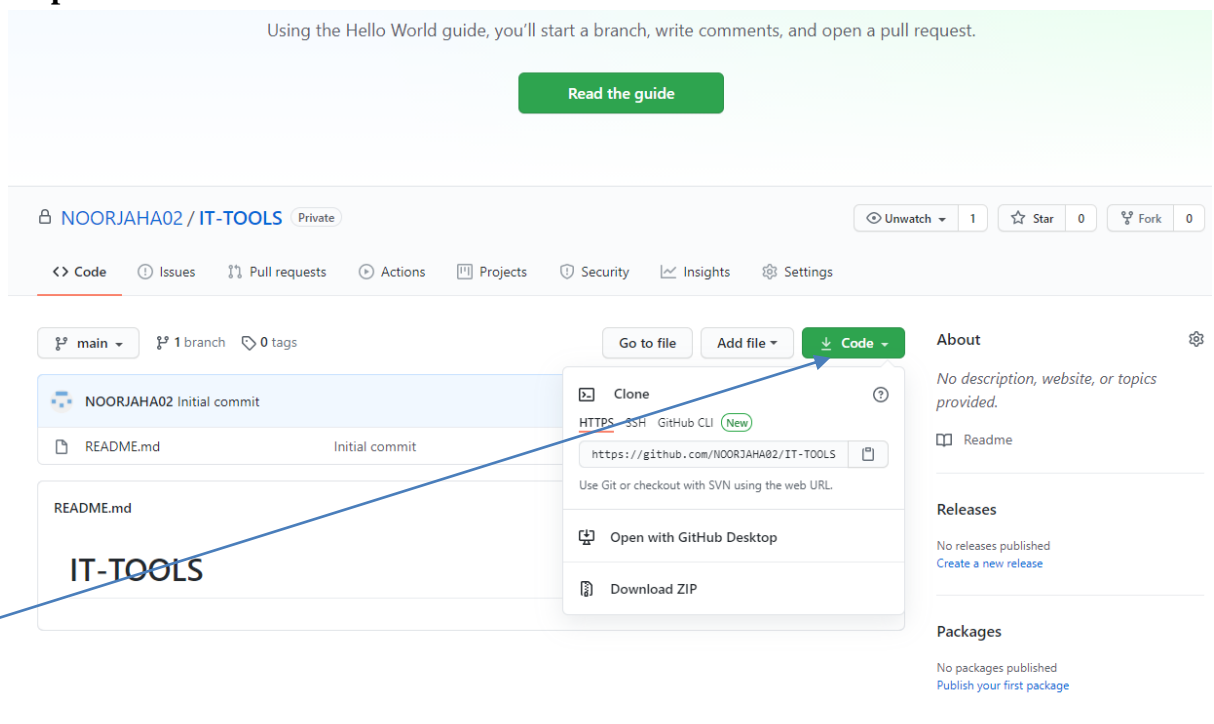

Step 4: Now the repository has been created as you can see below.

c) Cloning Repository:

Step 1: Click on the ‘Code’ button as mentioned below.

Step 2: Click on the clipboard icon as mentioned to copy the url. It will create a clone of your repository.

Using the Hello World guide, you'll start a branch, write comments, and open a pull request.
